

PSIMETRIC REMOTE VIEWING EXAMINATION

The World's Most Difficult PSI Test

© 2008 Brennan Martin. All Rights Reserved.

Objective: With Remote Viewing techniques apply sub-space mind to determine the target for each Target Reference Number identifier, 25 singular item coordinates; popular global monuments.

Elective: Express your answers in “verbal” or “pictorial” form, or therein a combination of the two! Notwithstanding, comments and explanations may be included with your submission as “supplementary” via sketches and other relevant data-types (alternative photographic images, sketches, verbal commentary).

Award: NZD\$10,000 prize for score of 80% (or plus) raw score of 20/25.

Conditions (A): PREVIEW is to be taken under your real full name (not nick-name; not stage-name; not past-life name); Multiple attempts are allowed; And if relevant list previous titles, dates and scores on PSI tests taken: chance-type supervised, e.g., Zener Card Trials; power-type unsupervised, e.g., Test for Extrasensory Perception (Paul Cozijmans).

Conditions (B): Include along side your submission with that requested in “(A)”: Age; Sex; Occupation; Country; Native-tongue; I.Q. scores on previously taken tests, relevant titles for those tests, date of assessment; Psychic training and PSI experiences detail (optional); And contact details for viable results reception (conditional).

(This information may be used for statistical and research purposes.)

Anti-triviality: This test is designed for highly-trained psychics to “know where they stand”, and not per se as a cure for megalomaniacs to “know if they stand”.

Eventuality: High-PSIMETRIC Society formulated - for the psychically talented.

Principality: Credit to Adam Kisby with unearthing an interminably more pertinent, more creative title to this test: “PREVIEW!”.

Example:

TRN 00000 → Answer: Auckland Sky Tower (Verbal); Or; (Pictorial)
